

ALOK KUMAR

Data Analyst | Business Intelligence & Automation Specialist

+91 6201695574 | kishorealok99@gmail.com | linkedin.com/in/alok-kumar | github.com/Alokkkr00

Professional Summary

Results-driven Data Analyst with 1+ year of experience building data visualization tools, business intelligence dashboards, and automated reporting pipelines across e-commerce, gaming, and logistics sectors. Proficient in Python, SQL, Power BI, and Tableau to construct predictive models, track KPIs, and translate complex data into actionable business insights. Skilled in end-to-end ETL processes, statistical modeling, data cleaning, and stakeholder reporting.

Technical Skills

Programming & Databases: Python (Pandas, NumPy, Scikit-learn), SQL (MySQL, PostgreSQL), Advanced Excel (Pivot Tables, VLOOKUP)

BI & Visualization: Power BI, Tableau, DAX, Data Modeling, Dashboard Design, Matplotlib, Seaborn

Data Engineering & Analytics: ETL Pipeline Design, REST APIs, Web Scraping, Time Series Forecasting (ARIMA), Statistical Analysis

Developer Tools & Methodologies: Git, GitHub, Jupyter Notebook, VS Code, Agile/Scrum, Requirement Gathering

Core Keywords / ATS Tags: Data Analytics, Business Intelligence, Automated Reporting, Machine Learning, Feature Engineering, Predictive Modeling, KPI Dashboards, Data Wrangling, Churn Analytics, Supply Chain Optimization

Experience

Data Analyst (Freelance)

Clients: E-commerce, Gaming, Logistics

Remote

August 2024 – Present

- Engineered an ARIMA time-series model on 18 months of historical inventory data for 200+ SKUs, cutting stockouts by 25% and reducing excess inventory by 30%.
- Built an automated Python and SQL data pipeline processing 1M+ daily events, replacing a 10-hour manual reporting workflow and reducing runtime to 4 hours with zero manual intervention.
- Designed and deployed 5 interactive Power BI and Tableau dashboards for a multi-city logistics startup, driving a 15% improvement in on-time delivery rates within Q1.
- Evaluated 500K+ ad request log records to identify peak-hour server bottlenecks, delivering optimization recommendations that improved ad-fill stability by 18%.

Projects

Automated Web Scraping & Pricing Intelligence System | Python, MySQL, Power BI

2024

- Engineered an automated web scraper using Python (BeautifulSoup/Requests) to collect product pricing and inventory data across multiple e-commerce platforms.
- Stored raw data in MySQL database, built automated cleaning scripts, and designed a Power BI dashboard to track competitor price fluctuations in real time.

Customer Churn & Retention Analytics | Python, Scikit-learn, Power BI, Tableau

2024

- Developed a Random Forest classification model on 7,000+ customer records utilizing SMOTE to address class imbalance, achieving 92% accuracy and an F1-score of 0.89.
- Built an interactive Power BI and Tableau dashboard highlighting high-risk churn segments, directly enabling targeted customer retention campaigns.

Real-Time Financial & Market Data Pipeline | Python, REST APIs, MySQL

2024

- Built an ETL pipeline using Python to extract live cryptocurrency and market data from REST APIs into a MySQL database.
- Created automated data transformation scripts to calculate rolling averages, volatility, and key trend metrics for daily executive briefings.

Education

University of Engineering and Management

Bachelor of Technology in Computer Science & Engineering

Jaipur, Rajasthan

June 2020 – July 2024

Certifications

Google Data Analytics Professional Certificate | Google / Coursera

2024

Python for Data Science, AI and Development | IBM / Coursera

2023
